

GOAT

COIN

LITEPAPER

## INTRODUCTION

**GOAT COIN** is an ERC-20 token, driven by reflect tokenomics and automated staking. Simply holding the token in your wallet will allow you to earn passively whilst the token trades between buyers and sellers. A transaction fee of 2% is charged, which is then redistributed to token holders. GOAT COIN was fair launched on 19th March 2021, with no team or development tokens allocated. The team behind GOAT COIN are highly experienced developers and have worked on many successful projects but are fascinated by the Meme & NFT connection currently transcending the cryptocurrency markets.

## GREATEST OF ALL TIME NFTs (G.O.A.T)

G.O.A.T is not your typical 'meme' token. G.O.A.T stands for the 'Greatest Of All Time'. The GOAT team also have expert designers who creates charcuteries of celebrities and sport stars who are considered The GOAT in their chosen field.

We have a vast opensea collection, where these Non Tangible Fungibles (NFTs) can be bought and sold. These charcuteries range from Kim Kardashian (\*Sold for 0.5 ETH) to Connor McGregor (\*Sold for 0.3 ETH). All income produced from NFT sales will be reinvested into developing GOAT Coin. Eventually, this income will be distributed back to token holders via innovative protocols.

## ULTIMATE AIM

The ultimate aim is to produce a NFT marketplace that will allow GOAT COIN to be used as a currency to buy and sell high-end charcuteries and associated fungibles related to A-list celebrities. This platform will then transcend further with 'Domain names' being digitalised and being available for sale on the platform.

This will bring great demand for the GOAT Coin, and we are currently seeking artists who would like to offer their digital art for sale on the platform. One of the greatest asset to this marketplace, there will be 0% fees to buy and sell on the platform. If G.O.A.T Coin is used to be bought and sold, this will be airdropped periodically back to token wallet holders. Therefore, creating a circular demand for the GOAT Coin whilst establishing a healthy ecosystem.

## TOKENOMICS

100,000,000 GOAT in circulation

30,000,000 GOAT sent Vitalik Buterin wallet

2% transaction fee, with the fee being automatically redistributed to token holders. Contract

Address: [0x37611b28aca5673744161dc337128cfdd2657f69](https://etherscan.io/address/0x37611b28aca5673744161dc337128cfdd2657f69)

Require 2.5% - 3% slippage to purchase the token
